

SCHOOLLING

About Us

Schoolling is an initiative which enables the parents to apply to multiple schools by filling a single online application form. According to a survey done by us, a parent applies to an average of 6.5 schools for which, he/ she needs to visit a school twice, once to collect the admission form & then to submit it along with the required documents. With the majority of parents falling into working class these days, they have to manage their leaves at work in order to visit the schools to collect/ submit forms. Also with every school having its own critical admission dates & procedure, parents end up maintaining a repository of all important dates & documents. Keeping all this in mind, we provide a platform for parents to complete the application process along with online submissions & timely updates on important dates & documentation, all without visiting the school for registrations.
